

# Table of contents

Preface	5
Chapter 1. Logical Units of Quantum Computers	9
1.1. The Quantum Bit	9
1.2. Quantum Logic Gates	18
Chapter 2. Spin qubits and relaxation processes	27
2.1. Tasks for quantum computing	27
2.2. The spin qubit	29
2.3. Electron relaxation phenomena	32
2.4. Spin-lattice relaxation	34
2.4.1. Relaxation pathways	35
2.5. Spin-spin relaxation and related phenomena	40
Chapter 3. Magnetic molecules for quantum information science	45
3.1. Molecular spin qubits	45
3.2. Molecular quantum logic gates	53
Chapter 4. Investigating the relaxation properties of molecular qubits	57
4.1. [Cu(TTDPz)] as an hydrogen-free molecular qubit	58
4.2. Further reducing the number of active nuclei: [Cu(dttd)] <sub>2</sub>	69
4.3 Beyond transition metals: [Dy(acac) <sub>3</sub> (H <sub>2</sub> O) <sub>2</sub> ]	81
Chapter 5. Exploiting [VO(TPP)] molecular qubit as a platform for advanced EPR experiments	93
5.1. Storage and retrieval of information within a molecular spin ensemble	94
5.2. Enhancing the coherence time at electronic clock transitions	101

5.3 Purification of [VO(TPP)] samples for time-resolved THz-EPR	108
Chapter 6. From single spins to porphyrin-based multi-qubit architectures	115
6.1. A multi-qubit system: [VO(TPyP)]{Cr <sub>7</sub> Ni} <sub>4</sub>	116
6.2 [VO(TrPP)] <sub>2</sub> as a potential two-qubit gate	125
Chapter 7. Conclusions	139
Appendix A. Theoretical background and experimental techniques	143
A.1. The spin-Hamiltonian	143
A.2. Magnetometry	148
A.3. Electron paramagnetic resonance	151
A.3.1. Continuous wave EPR spectroscopy	152
A.3.2. Pulsed EPR spectroscopy	154
Appendix B. Published supplementary material	157
B.1. Section 4.1: [Cu(TTDPz)]	157
B.1.1. PXRD Analysis	157
B.1.2. DC Magnetometry	158
B.1.3. X-band cw-EPR	158
B.1.4. Q-band EDFS in D <sub>2</sub> SO <sub>4</sub>	160
B.1.5. Fitting of <i>T</i> <sub>1</sub> and analysis of optical modes contributions	160
B.2. Section 4.3: [Dy(acac) <sub>3</sub> (H <sub>2</sub> O) <sub>2</sub> ]	161
B.2.1. AC susceptometry	161
B.2.2. Computed Raman transition rates	162
B.2.3. Computed SPC coefficients and electric dipoles resolved atomic sites	163
B.3. Section 5.1: [VO(TPP)] on coplanar resonators	163
B.3.1. Experimental setup	163
B.3.2 CW- and pulsed EPR on polycrystalline sample	164
Appendix C. Additional synthetic procedures and experimental results	167
C.1. Section 4.2: [Cu(dttt) <sub>2</sub> ]	167
C.1.1. Experimental TBAdttt	167
C.1.2. Experimental [M(dttt) <sub>2</sub> ]	169
C.1.3. PXRD analysis	170
C.1.4. UV-Vis and IR analysis	170
C.1.5. Thermogravimetric analysis	171
C.1.6. XPS Analysis of bulks samples	171
C.1.7. DC magnetometry	172
C.1.8. X-band cw-EPR	172
C.1.9 X-band HYSCORE measurements	173
C.2. Section 6.1: [VO(TPyP)]{Cr <sub>7</sub> Ni} <sub>4</sub>	173
C.2.1. Synthetic procedures	173

C.2.2. UV-Vis and FT-IR spectroscopy	175
C.2.3. Q-band cw-EPR spectroscopy on [VO(TPyP)]	176
C.2.4. Q-band Hahn-echo experiments on [VO(TPyP)]	176
C.2.4. Structure and Q-band cw-EPR characterization of Cu{Cr <sub>7</sub> Ni}	177
C.2.6. X-band CW-EPR spectroscopy on VO{Cr <sub>7</sub> Ni}	177
C.2.7. Q-band pulsed EPR spectroscopy on Cu{Cr <sub>7</sub> Ni}	178
C.3. Section 6.2: [VO(TrPP)] <sub>2</sub>	178
C.3.1. Synthetic procedures	178
C.3.2. PXRD analysis	180
C.3.3. Nutation experiments	180
C.3.4. Zeeman plots	181
