

Table of Contents

Introduction	3
PART I BACKGROUND	
1. Deep Learning: Strengths and Issues	7
1.1 Introduction to Deep Learning	
1.2 Deep Learning Achievements in 2020	
1.3 The Limits of Deep Learning	
2. Learning with Constraints	15
2.1 Notation	
2.2 Learning from Constraints	
2.3 Learning of Constraints	
PART II LEARNING FROM CONSTRAINTS	
3. Active Learning with Logic Constraints	25
3.1 Introduction	
3.2 Knowledge-driven Active Learning	
3.3 Experiments	
3.4 Related work	
4. Detecting Adversarial Attacks with Logic Constraints	37
4.1 Introduction	
4.2 Learning with Domain Knowledge	
4.3 Exploiting Domain Knowledge against Adversarial Attacks	

- 4.4 Experiments
- 4.5 Related Work

PART III LEARNING OF CONSTRAINTS

5. Devising Explanations with an Auxiliary Network	67
5.1 Introduction	
5.2 Scenarios	
5.3 Model	
5.4 Experiments	
5.5 Related Work	
6. An Explainable-by-Design Network	83
6.1 Introduction	
6.2 Entropy-based Logic Explanations of Neural Networks	
6.3 Experiments	
6.4 Related work	
7. Conclusions	99
7.1 Learning with logic constraints: strengths and limits	
7.2 Future Work	
Acknowledgements	103
Bibliography	105
Subject Index	119
