

# Contents

Preface	iii
Contents	vii
Index of Authors	xv
Invited Sessions	1
A censored point process model for extreme volcanic eruptions <i>Coles, S.</i>	3
Marginal models: recent developments and applications to categorical time series analysis <i>Colombi, R.</i>	14
Generalized Linear Latent and Mixed Models with composite links and exploded likelihood <i>Skron dal, A., Rabe-Hesketh, S.</i>	27
Statistical Analysis of Replicated Microarray Time Series Data <i>Speed, T., Tai, Y.C.</i>	40
Oral Sessions	41
Model selection for regression analyses with missing data <i>Aerts, M., Hens, N., Molenberghs, G.</i>	43
A computationally tractable multivariate random effects model for clustered binary data <i>Coll, B.A., Andres Houseman, E., Betensky, R.A.</i>	48
Localizing clusters in space-time point process data <i>Assunção, R., Tavares, A., Kulldorff, M.</i>	53

Parametric and semi-parametric approaches in the analysis of short-term effects of air pollution on health <i>Saez, M., Baccini, M., Biggeri, A., Lertxundi, A.</i>	58
Distributional results for FDR: application to genomic data <i>Bar-Hen, A., Daudin, J.J., Robin, S.</i>	63
Pairwise likelihood for generalized linear models with crossed random effects <i>Bellio, R., Varin, C.</i>	66
Linking gene-expression experiments with survival-time data <i>Ben-Tovim Jones, L., Ng, S-K., Monico, K., McLachlan, G.</i>	71
Rank tests of conditional independence for continuous variables <i>Bergsma, W.P.</i>	76
Investigating gene-specific variance via Bayesian hierarchical modelling <i>Blangiardo, M., Biggeri, A., Toti, S., Lagazio, C., Giusti, B.</i>	81
On the clustering term in ecological analysis: how do different prior specifications affect results? <i>Catelan, D., Biggeri, A., Lagazio, C.</i>	86
Bayesian focused clustering for a case-control study on lung cancer in Trieste <i>Biggeri, A., Dreassi, E., Lagazio, C., Marchi, M.</i>	91
Imputing missing phenotypes: a new family-based association test <i>Murphy, A., Blacker, D., Lange, C.</i>	96
Conditional Akaike information for mixed effects models <i>Vaida, F., Blanchard, S.</i>	101
Measuring noncompliance in insurance benefit regulations with randomized response methods for multiple items <i>Böckenholt, U., van der Heijden, P.G.M.</i>	106
Confidence intervals for the variance of random-effects linear models: a new Stata command <i>Bottai, M., Orsini, N.</i>	111
Geoadditive survival models <i>Hennerfeind, A., Brezger, A., Fahrmeir, L.</i>	116
Statistical models for market segmentation <i>Camilleri, L., Green, M.</i>	121

Models of double monotone dependence for two way contingency tables <i>Cazzaro, M., Colombi, R.</i>	126
Non-parametric estimation of an intervention effect with staggered intervention times <i>Sousa, I., Chetwynd, A., Diggle, P.</i>	131
Exploratory analysis of epidemiological time series by means of transfer function models <i>Chiogna, M., Gaetan, C.</i>	134
Efficient smoothing of d-dimensional arrays <i>Currie, I., Durbán, M., Eilers, P.</i>	139
Assessment of variance components in elliptical linear mixed models <i>Savalli, C., Paula G.A., Cysneiros, F.J.A.</i>	144
Modelling financial durations between price movements <i>De Luca, G., Gallo, G.M.</i>	149
Wavelet analysis of electrical signals obtained from experimental design <i>Di Bucchianico, A., Wynn, H.P., Figarella, T.</i>	154
The shifted warped normal model for mortality <i>Eilers, P.H.C.</i>	159
Structured additive regression for multicategorical space-time data: a mixed model approach <i>Kneib, T., Fahrmeir, L.</i>	164
Analyzing plaid designs using mixed models <i>Siannis, F., Farewell, V.T.</i>	169
Model building and interpretation of ordinal multilevel random effects models with exogeneity and endogeneity <i>Fielding, A., Spencer, N.</i>	174
Bayesian techniques for modelling volcanic processes <i>Furlan, C.</i>	179
Bayesian analysis of transmission dynamics of experimental epidemics <i>Streftaris, G., Gibson, G.J.</i>	184
Weighted estimation of variance components and fixed effects in small area models <i>Militino, A.F., Ugarte, M.D., Goicoa, T.</i>	189

A polytomous response multilevel model with a non ignorable selection mechanism <i>Grilli, L., Rampichini, C.</i>	194
Joint modelling of cluster size and binary and continuous outcomes <i>Gueorguieva, R.</i>	199
Overdispersion in Wadley's problem <i>Haines, L.M., Leask, K.</i>	204
Model selection for P-spline smoothing using Akaike information criteria <i>Wager, C., Vaida, F., Kauermann, G.</i>	209
A Bayesian accelerated failure time model with a normal mixture as an error distribution <i>Komárek, A., Lesaffre, E.</i>	214
This misclassification SIMEX <i>Küchenhoff, H., Lesaffre, E., Mwalili, S.M.</i>	219
Statistical inference for data files that are computer linked <i>Liseo, B., Tancredi, A.</i>	224
Advances in covariance modelling <i>MacKenzie, G.</i>	229
Nonparametric modelling of longitudinal data: a varying coefficients model <i>Orbe-Mandaluniz, S., Núñez-Antón, V., Rodríguez-Póo, J.M.</i>	234
Quasi-Monte Carlo estimation in generalized linear mixed models <i>Pan, J., Thompson, R.</i>	239
Modelling covariance structures in generalized estimating equations for longitudinal data <i>Ye, H., Pan, J.</i>	244
Count distributions with mixed Poisson random effects <i>Puig, P., Valero, J.</i>	249
Improving the relevance vector machine under covariate measurement error <i>Rummel, D.</i>	254
Class prediction and gene selection for DNA microarrays using sliced inverse regression <i>Scrucca, L.</i>	259
Is the gene between the two markers or not? <i>Skovgaard, I.M.</i>	264

Bayesian covariance and variable selection for explaining consumer behaviour <i>Tüchler, R.</i>	268
Hierarchical Bayesian Modelling of Spatial Interactions of Gene Expression on the Tuberculosis Genome <i>Wit, E., Friel, N.</i>	273
<b>Poster Sessions</b>	<b>279</b>
Multivariate linear model for selection of oilseed rape genotypes <i>Kaczmarek, Z., Adamska, E., Cegielska-Taras, T.</i>	281
Mixed model for studying the stability of phenotypic gene effects <i>Surma, M., Kaczmarek, Z., Adamski, T.</i>	286
Split-plot x split-block type three factor designs <i>Ambroży, K., Mejza, I.</i>	291
Optimization of fiber tracking in human brain mapping: statistical challenges <i>Heim, S., Hann, K., Auer, D.P., Fahrmeir, L.</i>	296
Estimates of the short term effects of air pollution in Italy using alternative modelling techniques <i>Baccini, M., Biggeri, A., Accetta, G., Lagazio, C., Lertxundi, A., Schwartz, J.</i>	301
A multivariate latent Markov model for the analysis of criminal trajectories <i>Bartolucci, F., Pennoni, F.</i>	306
Application of the modified profile likelihood in stratified models <i>Bellio, R., Sartori, N.</i>	310
Analysis of breast cancer survival data with missing information on stage of disease and cause of death <i>Bellocco, R.</i>	315
A split-plot analysis for microarray experiments <i>Berni, R., Stefanini, F.M.</i>	320
Comparison between the parametric mixing distribution with Mover-stayer model and the nonparametric mixing distribution for the analysis of Tower of London data <i>Shahadan, M.A., Berridge, D.</i>	325
PH and non-PH frailty models for multivariate survival data <i>Blagojevic, M., MacKenzie, G.</i>	330

Assessing reliability and agreement of repeated measurements by hierarchical modeling <i>Brazzale, A.R., Salvan, A., Parazzini, M.</i>	335
Daily volatility modelling using ultra-high frequency data <i>Brownlees, C.T., Lombardi, M.J.</i>	339
Control of the false discovery rate with Bayes factors. An application to microarray data analysis <i>Cabras, S., Racugno, W.</i>	344
Parametric vs semiparametric in interval censored data <i>Parrinello, G., Calza, S., Valentini, U., Cimino, A., Decarli, A.</i>	349
Regression models for the analysis of psychiatric data <i>Canal, L., Micciolo, R.</i>	351
A statistical method for the estimation of childhood cancer prevalence among adults <i>Gigli, A., Simonetti, A., Capocaccia, R., Mariotto, A.</i>	356
Chemical balance weighing designs with correlated errors based on balanced block designs <i>Ceranka, B., Graczyk, M.</i>	361
The forward search for generalised extreme value distributions <i>Laurini, F., Corbellini, A.</i>	366
Modelling breast cancer data with informative dropout <i>Oskrochi, G.R., Crouchley, R.</i>	371
Local influence and residual analysis in heteroscedastic symmetrical linear models <i>Cysneiros, F.J.A.</i>	376
Modelling the costs of different strategies after myocardial infarction <i>Zigon, G., Desideri, A., Gregori, D.</i>	381
Semiparametric comparison of two samples <i>Fokianos, K.</i>	386
Analysis of interval-censored data: a simulation study <i>Siqueira, A.L., Fonseca, I.K.</i>	390
Two-stage models to control for overdispersion in longitudinal count data <i>Fotouhi, A.R.</i>	395
Multilevel logit models: a comparison of estimation procedures <i>Fotouhi, A.R.</i>	400

Seasonal variation in death counts: P-Spline smoothing in the presence of overdispersion <i>Gampe, J., Rau, R.</i>	405
Power-divergence goodness-of-fit statistics: small sample behavior in one way multinomials and applications to multinomial processing tree (MPT) models <i>Núñez-Antón, V., García-Pérez, M.A.</i>	410
A latent variable model of creativity and social compromise <i>Georganta, Z., Kandilorou, H., Livada, A.</i>	415
Quasi-likelihood ratio statistic for robust hypothesis testing in the presence of nuisance parameters <i>Greco, L., Ventura, L.</i>	420
Microarray experiments for gene expression in fish stress studies <i>Holian, E., Hinde, J.</i>	425
A growth mixture model for multivariate outcomes: application to cognitive ageing <i>Proust, C., Jacqmin-Gadda, H.</i>	430
Exact Bayesian inference for bivariate Poisson data <i>Karlis, D., Tsiamyrztis, P.</i>	435
An evaluation of classification techniques applied to the field of NIR/IR spectroscopy <i>Kidd, M.</i>	440
Identifying important input variables by applying alignment in kernel Fisher discriminant analysis <i>Low, N., Steel, S.J.</i>	445
Statistical modelling for the time projection chamber signal processing: how can statistics improve detector performances? <i>Maniero, S., Ventura, L., Pietropaolo, F., Ventura, S.</i>	450
Assessing the effect of a teaching program on breast self-examination in a randomized trial with noncompliance and missing data <i>Mattei, A., Mealli, F.</i>	455
Variance free model for two-way layout with interaction <i>Mexia, J.T., Mejza, S.</i>	460
Logit Model for TB in Europe (1995-2000) <i>Nunes, S., Mexia, J.T., Minder, C.</i>	465
Series of studies with a common structure: an application to European economic integration <i>Oliveira, M.M., Ramos, L., Mexia, J.T.</i>	470

<b>Bayesian modelling volatility with mixture of alpha-stable distributions</b> <i>Monno, L., Petrella, L., Tancredi, A.</i>	<b>474</b>
<b>Approximated piecewise linear mixed modelling with random change-points for longitudinal data analysis</b> <i>Muggeo, V.M.R.</i>	<b>479</b>
<b>A comparison between measure scales for quality evaluation using the Rasch Model</b> <i>Zanarotti, C., Pagani, L.</i>	<b>484</b>
<b>On probabilities of avalanches triggered by alpine skiers. An application of models for counts with extra zeros</b> <i>Pfeifer, C., Rothart, V.</i>	<b>489</b>
<b>Fieller's method for mixed models</b> <i>Rønn, B.B.</i>	<b>494</b>
<b>Predictive model selection criteria for logistic regression</b> <i>Vidoni, P.</i>	<b>499</b>
