

## *Contents*

### Invited lectures

- L.1 Why does triz fly but not soar? 3  
*Victor Fey*
- L.2 Professional strategic innovation contra innovation management -  
only – 5  
*Hansjürgen Linde, Gunther Herr, Andreas Rehklau*

### 1. Case studies

- 1.1 Lighting helmet for Formula 1 29  
*Siegfried Luger*
- 1.2 An example of systematic innovation in a very small enterprise:  
a new packaging for fresh vegetables 39  
*Vinicio Tresin, Licia Pengo*
- 1.3 Using TRIZ to accelerate Technology Transfer in the  
pharmaceutical industry 45  
*Ellen Domb, Arthur Mlodozieniec*
- 1.4 Innovation and TRIZ methodology along the product development  
process: a study case in textile and medical fields 51  
*Caterina Rizzi, Daniele Regazzoni, Nicoletta Locatelli*
- 1.5 Development of new mosquito traps by using Substance Field and  
Resource Analysis 61  
*Kyeong-Won Lee*
- 1.6 Laws of system evolution in the development of the thermal bridge  
problem 67  
*Mateusz Slupinski*
- 1.7 Solving a real world inventory management problem using a  
technique for integrating ideality with the System Operator 75  
*Benjamin R. Martin, Timothy G. Clapp, Jeffery A. Joines*
- 1.8 Analogies and TRIZ, two creativity techniques used in legged  
robots 87  
*Simona M. Cretu*

1.9 Value Analysis and TRIZ: parallelism of a new technological culture in Mexico	97
<i>Edgardo Cordova Lopez, Maribel Lastrini Arroyo</i>	
<b>2. Methods Integration and Interactions</b>	
2.1 The next common sense: philosophy-level integration of TRIZ into an integrated business and management innovation process	109
<i>Darrell Mann</i>	
2.2 Innovation in performance excellence: Eight Paradigms to Performance Excellence (8PPE)	119
<i>Michael S. Slocum</i>	
2.3 The integration and use of TRIZ with other innovation and creativity tools	131
<i>Jack Hipple</i>	
2.4 Thoughts about the development of individual abilities of human being in the context of TRIZ	141
<i>Jan Campbell</i>	
2.5 TRIZ as a lean thinking tool	157
<i>Sergei Ikovenko, Jim Bradley</i>	
2.6 TRIZ applied to Axiomatic Design, and case study: improving tensile strength of polymer insulator	165
<i>Young Ju Kang, Alexander Skuratovich, Pyeong Kwan Chung</i>	
<b>3. Knowledge and Intellectual Property management</b>	
3.1 Innovations through enhanced RCA ontological search and TRIZ based reasoning	179
<i>Haibo Duan, Serge Pesetsky, Minyi Zhang</i>	
3.2 Knowledge Management and TRIZ: A Model for Knowledge Capitalization and Innovation	185
<i>Guillermo C. Robles, Stephanie Negny, Jean-Marc Le Lann</i>	
3.3 Multilanguage patent analysis and classification	199
<i>Gaetano Cascini, Federico Neri</i>	

4. Innovation strategies: from SMEs to world wide corporates	
4.1 TRIZ in small business - competitive advantage	213
<i>Mikael S. Rubin</i>	
4.2 Innovative Enterprise Infrastructure	227
<i>Valeri Souchkov</i>	
4.3 The role of TRIZ champions: a review of current practice	237
<i>Elies Dekoninck, Paul Frobisher</i>	
4.4 Selecting of key problems and solution search area in forecasting	247
<i>Peter Chuksin</i>	
4.5 Application of TRIZ method to business management activities	253
<i>Bernard Monnier</i>	
4.6 Improving innovation using TRIZ	263
<i>Paul Frobisher, Elies Dekoninck, Tony Mileham, Julian Vincent</i>	
4.7 The possibility of effective new product planning activities by utilizing "The patterns of technological system evolution"	275
<i>Manabu Sawaguchi</i>	
5. Development and implementations of TRIZ Theory	
5.1 Contribution to early stages analysis: a framework for contradiction's complexity representation	291
<i>Thomas Eltzer, Denis Cavallucci, Philippe Lutz, Nikolai Khomenko</i>	
5.2 Patterns in TRIZ Contradiction Matrix:integrated and distributed systems	305
<i>Olga Bogatyreva, Alexander Shillerov, Nikolay Bogatyrev</i>	
5.3 Logic of ARIZ	315
<i>Vlamidir Petrov</i>	
5.4 EMS Models: adaptation of engineering design black-box modeling for use in TRIZ	333
<i>Madara Ogot</i>	
5.5 USIT operators for solution generation in TRIZ: clearer guide to solution paths	347
<i>Toru Nakagawa</i>	

5.6 Mapping the innovation space one: novel tools for problem definition in product innovation <i>Barry Winkless, John Cooney</i>	365
6. TRIZ education	
6.1 Case studies of TRIZ application in the diploma thesis in Technical Universities Czech Republic <i>Pavel Jirman, Bohuslav Busov</i>	375
6.2 Training course support fostering methodical product- and process- development by combining TRIZ-Tools and Sustainable Development <i>Jurgen Jantschgi</i>	383
7. New opportunities & fields of application	
7.1 Monitoring Innovation: an integrated institutionalist approach (comparative framework) <i>Frederic Morand</i>	397
7.2 TRIZ and marketing <i>Ludmila N. Semenova</i>	411
7.3 A contribution to history of technology: analyzing Leonardo's textile machines and his inventive process according to TRIZ patterns of evolution, <i>Gaetano Cascini, Davide Russo, Romano Nanni</i>	419
7.4 System approach to failures of technical systems <i>Vissarion Sibiriakov, Avraam Seredinski</i>	437
7.5 Medical education optimization by new pioneering training <i>Leonid B. Naumov</i>	445
7.6 Benchmarking TRIZ in the field of product service systems "PSS" <i>Ahmad Abdalla, Berthold Bitzer, Danny Morton</i>	461
7.7 Innovation Mapping: Integration of principles and trends into innovation directions, evolutionary potential and a conflict map <i>Simon Dewulf, Gertjan Otto, Alexei Bogdanov</i>	481

8. Posters and extended abstracts	
8.1 TRIZ education with computer based training system <i>Haibo Duan, Serge Pesetsky, Yue Lin</i>	491
8.2 Different approaches to TRIZ inculcation in different firms <i>Avraam Seredinski, Vissarion Sibiriakov</i>	497
8.3 TRIZ propagation strategies and system in Korea <i>Jinha Jeong</i>	501
8.4 New TRIZ-Based Tool—Function-Oriented Search (FOS) <i>Simon S. Litvin</i>	505
8.5 Tetrahedron of evolution four elements, one principle functional symmetry <i>Simon Dewulf, Gijs Bakker</i>	509
8.6 Innovator: customization of TRIZ-sourced innovation tools <i>Matthieu Mottrie, Simon Dewulf</i>	517
8.7 A methodology to devise digital electronic applications <i>Norma F. Roffe</i>	523
