

Index

Abbreviations	9
Chapter 1	
Introduction	11
1. Overview: Memory Formation in the Healthy Brain and Alterations Underlying Memory Impairments in Neurodegenerative Processes	11
2. Learning and Memory	13
3. The Cholinergic System	14
4. Muscarinic Receptors	15
5. Nicotinic Receptors	18
6. The Cholinergic System in the Mechanisms of Learning and Memory	21
7. Hippocampal Long Term Potentiation and Memory	22
8. Short Term and Long Term Memory: Role of mTOR Pathway	24
9. Associative Learning and Memory: Step Down Inhibitory Avoidance	26
10. Pathophysiological Mechanism of Memory Impairment in Neurodegenerative Processes: Alterations in the Neurons-Glia Interplay	26
10.1 Astrocytes Functions in Healthy Brain and Alterations in Neurodegenerative Processes	26
10.2 Microglia Functions in Healthy Brain and Alterations in Neurodegenerative Processes	30
11. Pathophysiological Mechanism of Memory Impairment in Neurodegenerative Processes: Alterations in the Cerebrovascular Functionality	32
12. Dipyridamole as Neuroprotectant in Cerebrovascular Diseases	38
Chapter 2	
Aim of the Research	41
Chapter 3	
Part I - Materials and Methods	45
1. Animals	45
2. Surgery: Implantation of Cannula for Intracerebroventricular Injection of Rapamycin or Mecamylamine	45
3. Drug Treatments	45

Mechanisms of memory encoding and neurodegeneration in the rat hippocampus

4. MALDI-TOF-TOF Profiling of RAPA	46
5. Step Down Inhibitory Avoidance Task	47
6. Bright Field and Fluorescent Immunohistochemistry	47
7. <i>In Vitro</i> Stimulation of Hippocampal Slices	48
8. Quantitative Analysis and Statistics	49

Chapter 4

Part II - Materials and Methods

1. Animals	51
2. Surgery: Implantation of an Osmotic Minipump for Intracerebroventricular Injection of LPS	51
3. Behavioral Testing Procedures	52
4. Immunohistochemistry: Antibodies Used	52
5. Bright Field and Fluorescent Immunohistochemistry	53
6. Widefield and Confocal Fluorescence Microscopy	54
7. Quantitative Analysis on Histological Samples	55
8. Western Blot	55
9. Statistical Analyses	56

Chapter 5

Part III - Materials and Methods

1. Animals	57
2. Surgery: Bilateral Common Carotid Artery Occlusion	57
3. Drug Administration	57
4. Immunohistochemistry: Antibodies Used	58
5. Fluorescent Immunohistochemistry	59
6. Widefield and Confocal Fluorescence Microscopy	59
7. Quantitative Analysis on Histological Samples	61
8. Statistical analyses	61

Chapter 6

Part I - Results

1. MALDI-TOF-TOF Profiling of RAPA	61
2. Rapamycin Impairs Long Term Memory and mTOR and p70S6K Activation in CA1 Pyramidal Cells	63
3. Effect of Cholinergic Blockade by Muscarinic and Nicotinic Receptors Antagonists on Memory Encoding and mTOR and p70S6K Activation	66
4. <i>In Vitro</i> Experiments	69
