3.3 Imperfect information by voters and government abuse of power	23
3.4 A model of inefficient budget determination and Spending review	25
<b>Chapter 2 – Topics on Economics of Law</b>	<b>29</b>
1. Civil law, liability and incentives	29
2. Property law	31
2.1 Property rights and the theory of firm	31
2.2 Conflicts in the use of property: The tragedy of the Commons	33
2.3 Conflicts in the use of property: Externalities and market inefficiency	35
2.4 Solving the conflicts by bargaining: The Coase theorem	36
3. Contracts	37
3.1 Nature and functions of contracts	37
3.2 Contract formation: search effort	38
3.3 The efficient performance of a contract	39
3.4 Reliance investment during the contract period	40

3.5 Asymmetric information and incentives	40
4. Litigation and suit	42
4.1 Private incentive to suit and socially optimal level of suits	42
4.2 Settlement versus trial and the legal fees distribution rule	43
4.3 Suit duration and the pathological demand for trials	44
4.4 The specificity of the administrative trial	45
5. Law enforcement	47
5.1 Rationale for public enforcement	47
5.2 Corruption	48
5.3 Tax evasion	49
5.4 Anticompetitive collusion	51

### **Chapter 3 – Public versus private ownership of public services enterprises 55**

1. The application of the theory of incomplete contracts to public services	55
2. Incomplete contracts and the nature of enterprises ownership	55
3. Public-private partnership and Project financing	57
4. The governmental choice of funding means of a public-private partnership contract	59
4.1 The choice between tariffs and taxes	59
4.2 Hot versus cold works	60
5. Privatization rationale and sale price	61
5.1 The social desirability of privatization	61
5.2 The socially beneficial sale price	62

### **Chapter 4 –Public versus private organization in health care economics 65**

1. Health care specificity and government intervention	65
1.1 Health care services and individual well-being	65
1.2 From the rationale of public intervention to health care systems typologies	66
1.3 Health care systems and risk disease coverage	70
2. Organization of health care production and provision	71
2.1 Health care industrial organization of production: separation versus integration	71
2.2 Systems of payment of providers: Tariffs for treatments and incentives	73

<b>Chapter 5 –A Political economy approach to local governments choices</b>	<b>75</b>
1. Modelling local governments choices with equalization transfers	
1.1 Consumers preferences	76
1.2 The local government revenues	76
1.3 Needs and costs	78
1.4 Government preferences	79
2. The Political economy equilibrium	79
2.1 Equilibrium conditions	79
2.2 Simple comparative statics	82
