

Table of Contents

Part I

Introduction

Chapter 1

Motivation: the brain challenge 13

Chapter 2

The neuron 17

Chapter 3

Fluorescence theory 21

3.1 Two-photon excitation fluorescence 24

Chapter 4

The Green Fluorescent Protein 27

Chapter 5

Genetically encoded Ca^{2+} indicators 31

5.1 GCaMP6s 35

Chapter 6

Fluorescence microscopy 37

6.1 Wide-field fluorescence microscopy 38

6.2 Light-sheet fluorescence microscopy 39

6.2.1 Light-sheet fluorescence microscopy: drawbacks and solutions 44

6.2.1.1 Bessel beams illumination 45

Chapter 7

Zebrafish in neurosciences 47

7.1 Zebrafish and epilepsy 54

Part II

Methods

Chapter 8

| | |
|--|-----------|
| Generation of the GCaMP6s transgenic zebrafish line | 59 |
| 8.1 Amplification of plasmid tol2-elavl3:H2B-GCaMP6s | 60 |
| 8.1.1 Bacterial transformation with tol2-elavl3:H2B-GCaMP6s plasmid | 60 |
| 8.1.2 tol2-elavl3:H2B-GCaMP6s plasmid extraction | 60 |
| 8.2 In vitro transcription of tol2 plasmid | 61 |
| 8.3 Microinjection | 61 |
| 8.4 Transgenic line selection | 62 |
| | |
| Chapter 9 | |
| Microscopes | 65 |
| 9.1 Wide-field fluorescence microscope | 65 |
| 9.2 Dual-illumination light-sheet fluorescence microscope | 66 |
| 9.3 Two-photon light-sheet microscope | 68 |
| | |
| Chapter 10 | |
| Zebrafish husbandry | 71 |
| | |
| Chapter 11 | |
| Sample mounting | 73 |
| 11.1 Wide-field fluorescence microscopy imaging | 73 |
| 11.2 Dual-illumination light-sheet fluorescence microscopy imaging | 73 |
| 11.3 Two-photon light-sheet fluorescence microscopy imaging | 74 |
| | |
| Chapter 12 | |
| Chemicals preparation | 77 |
| | |
| Chapter 13 | |
| Optical measurements | 79 |
| 13.1 Wide-field optical mapping measurements | 79 |
| 13.1.1 Combined electrographic and fluorescence recordings | 79 |
| 13.1.2 High-throughput measurements | 79 |
| 13.2 Dual-illumination light-sheet fluorescence microscopy measurements | 80 |
| 13.3 Two-photon light-sheet fluorescence microscopy measurements | 81 |
| | |
| Chapter 14 | |
| Data analysis | 83 |
| 14.1 Wide-field optical mapping measurements analysis | 83 |
| 14.1.1 High-throughput measurements analysis | 84 |
| 14.2 Dual-illumination light-sheet fluorescence microscopy measurements analysis | 84 |
| 14.2.1 Haemodynamic artefacts measurements analysis | 84 |

| | |
|---|----|
| 14.2.2 Bessel beam illumination light-sheet microscopy 3D optical mapping analysis | 87 |
| 14.3 Two-photon light-sheet fluorescence microscopy whole-brain measurements analysis | 88 |

Part III

Results

Chapter 15

Optical mapping of zebrafish neuronal activity in a pharmacological model of epilepsy 93

| | |
|--|----|
| 15.1 GCaMP6s optical measurements show basal and PTZ-altered activity in the zebrafish brain | 93 |
|--|----|

| | |
|--|----|
| 15.2 GCaMP6s fluorescence measurements are sensitive to different PTZ concentrations | 95 |
|--|----|

| | |
|--|----|
| 15.3 Correlation analysis among brain regions and locomotor activity | 97 |
|--|----|

| | |
|---|-----|
| 15.4 High-throughput combined fluorescence and behavioural recordings | 102 |
|---|-----|

Chapter 16

Bessel beam illumination as a means to reduce artefacts in quantitative functional studies using light-sheet microscopy 105

| | |
|---|-----|
| 16.1 Streaking artefacts obscure microscopic features of interest | 105 |
|---|-----|

| | |
|--------------------------------|-----|
| 16.2 Flickering quantification | 108 |
|--------------------------------|-----|

| | |
|---|-----|
| 16.3 Impact of flickering on neuronal activity measurements | 110 |
|---|-----|

| | |
|--|-----|
| 16.4 Flickering artefacts mask neuronal correlations | 111 |
|--|-----|

Chapter 17

3D optical mapping of zebrafish neuronal activity with single cell resolution by Bessel beam illumination light-sheet microscopy 115

Chapter 18

Fast whole-brain functional imaging by two-photon light-sheet fluorescence microscopy 119

Part IV

Discussion

Chapter 19

Optical mapping of neuronal activity during PTZ-induced seizures 131

Chapter 20

Bessel beam illumination reduces haemodynamic artefacts in functional lightsheet fluorescence microscopy 135

| | |
|---|------------|
| Chapter 21 | |
| 3D mapping of zebrafish neuronal activity by Bessel beam illumination lightsheet fluorescence microscopy | 139 |
| Chapter 22 | 141 |
| Whole-brain neuronal dynamics by two-photon light-sheet fluorescence microscopy | 141 |
| Part V | |
| Future directions | 143 |
| Part VI | |
| Appendices | |
| Appendix A | 149 |
| Appendix B | 175 |
| Bibliography | 181 |
| List of publications | 193 |
| Acknowledgements | 195 |
