

## Table of contents

Foreword by Prof. Shibru Tedla, Addis Ababa	7
Foreword by FT herbarium, Università degli Studi di Firenze	9
Introduction	11
Materials and Methods	17
Fieldwork	17
Herbarium specimens	18
Texts	20
Photographs	22
Maps and other topographical sources	23
Chapter 1	
Background: The Royal Academy of Italy and the Mission to the Study of Lake Tana in 1937	25
The establishment and role of the Royal Academy of Italy	25
Giotto Dainelli, the Royal Academy of Italy and the Study Centre for Italian East Africa	26
Giotto Dainelli's review of the ideas behind the mission to the study of Lake Tana and a general report on the mission	29
Chapter 2	
Pichi Sermolli: career before, during and after the mission to Lake Tana	35
Giotto Dainelli's views in retrospect of the mission to the study of Lake Tana and on Pichi Sermolli's results (Dainelli in Pichi Sermolli 1951).	39
Pichi Sermolli continued to be interested in the botany of the Horn of Africa	40

Chapter 3	
Pichi Sermolli's field observations of Ethiopian vegetation	43
Botanical research in the Lake Tana region and in the Semien (Pichi Sermolli 1938a).	51
Aspects of the landscape and vegetation in the High Semien (1939)	67
Observations on the vegetation of the western slope of the Ethiopian Highland (published in 1940; here as Pichi Sermolli 1940b).	77
"Introduction" to the publication "Mission to the study of Lake Tana. Vol. 7. Botanical researches. Part 1. Fanerogame ..." (Pichi Sermolli 1951).	90
Chapter 4	
Results: collections, new species, infraspecific taxa, combinations, replacement names and their type material	101
The collections: incorporation in Erbario Tropicale (Centro Studi Erbario Tropicale) and distribution of duplicates	101
The new taxa, their types and other nomenclatural changes	103
Chapter 5	
Chronological list of collecting localities with update of identification of species collected	115
Chapter 6	
Updated numerical list of Pichi Sermolli's Ethiopian collections from 1937	249
Ferns and fern allies not in Pichi Sermolli (1951)	277
Chapter 7	
Later studies of localities around Lake Tana and in the Semien Mountains	281
Chapter 8	
Pichi Sermolli's observations of vegetation compared with models of the vegetation	285
Chapter 9	
Conclusions	301
Acknowledgements	303
References	305
Indexes and synonymy	311
1. Index to locality names	311
2. Index to plant names in this work.	315
3. Identifications of names used by Pichi Sermolli (1951) but not accepted in the Flora of Ethiopia and Eritrea, with recent synonyms	329
4. List of archival numbers and dates of Pichi Sermolli's photographs	338
Maps	341
