

Analytical Index

A

- A-HDM, *vedi* Adaptive Hybrid Distance Minimization
- A-PDM, *vedi* Adaptive Point Distance Minimization
- A-QI, *vedi* Adaptive Quasi-Interpolation
- A-TDM, *vedi* Adaptive Tangent Distance Minimization
- Activation function, 30
- Activation functions, 5
- Active cells, 23
- Active functions, 23
- Adaptive Hybrid Distance Minimization (A-HDM), 130
- Adaptive loop, 8
- ESTIMATE step, 8
 - MARK step, 8
 - REFINE step, 8
 - SOLVE step, 8
- Adaptive Point Distance Minimization (A-PDM), 130
- Adaptive Quasi-Interpolation (A-QI), 130
- Adaptive Tangent Distance Minimization (A-TDM), 130
- Affine transformations, 18
- AI, *vedi* Artificial Intelligence
- Artificial Intelligence (AI), 5, 28

B

- B-splines, 3, 15
 - basis functions, 17
 - curves, 18
 - definition, 17
 - piecewise polynomial, 16
 - properties, 17
 - local support, 17
 - non-negativity, 17
 - partition of unity, 17
 - recursive definition, 16
 - tensor-product, 19
- Backpropagation, 5
- Bernstein polynomials, 18
- Bernstein-Bezier form, 18
- Bezier form, *vedi* Bernstein polynomials
- Bias, 30
- BIDGCN, *vedi* Boundary Informed Dynamic Graph Convolutional Network
- Binary classification, 30
- Boundary detection, 108
- Boundary Informed Dynamic Graph Convolutional Network (BIDGCN), 108

C

- CAD, *vedi* Computer Aided Design

CAGD, *vedi* Computer Aided Geometric Design
 CAM, *vedi* Computer Aided Manufacturing
 CEN, *vedi* Centripetal parameterization
 Centripetal parameterization (CEN), 72
 CHL, *vedi* Chord-length parameterization
 Chord-length parameterization (CHL), 72
 CNN, *vedi* Convolutional Neural Networks
 Computer Aided Design (CAD), 3
 Computer Aided Geometric Design (CAGD), 3
 Computer Aided Manufacturing (CAM), 3
 Control points, 19
 Convex combination, 18
 Convex hull, 19
 strong, 19
 Convolutional Neural Networks (CNN), 5, 34
 definition, 34
 Convolutional operators, 5
 Curves
 planar, 18
 spatial, 18

D

DAG, *vedi* Directed Acyclic Graph
 Data-driven parameterization, 98
 Deep Learning (DL), 3, 5, 27
 definition, 29
 Degree elevation, 19
 Degrees of Freedom (DOFs), 4
 Directed Acyclic Graph (DAG), 29
 Distance minimization, 129
 DL, *vedi* Deep Learning
 DOFs, *vedi* Degrees of Freedom

E

Edge convolution, 6
 End-point interpolation, 19
 Error estimation, 8
 ESTIMATE step, *vedi* Adaptive loop

F

Fitting, 6
 adaptive, 130
 hierarchical, 130
 spline, 6
 with moving
 parameterization, 130
 Footpoint projection, 131
 Fully Connected Neural Network, 31

G

GCN, *vedi* Graph Convolutional Networks
 Geometric deep learning, 36
 Geometric modeling, 3
 Gradient-based optimization, *vedi* Optimization, gradient-based
 Graph Convolutional Networks (GCN), 6, 36
 spatial methods, 36
 spectral methods, 36
 Graph structure, 6
 Grids
 tensor-product, 19

H

Hausdorff distance (HSD), 81
 HB-splines, *vedi* Hierarchical B-splines, *vedi* Hierarchical B-splines
 HDM, *vedi* Hybrid Distance Minimization
 Hidden layers, 30
 Hierarchical B-splines (HB-splines), 4, 22

- active functions, 23
 - selection mechanism, 23
- Hierarchical levels, 22
- Hierarchical mesh, 23
- Hierarchical splines, 22
- HSD, *vedi* Hausdorff distance
- Hybrid Distance Minimization (HDM), 130

- I**
- Input layer, 30
- Interpolation, 40

- J**
- J-PDM, *vedi* Joint Point Distance Minimization
- Joint Point Distance Minimization (J-PDM), 150

- K**
- Knot insertion, 19
- Knot lines, 21
- Knot vectors, 16

- L**
- LBFGS, 151
- Least squares (LS), 41
- local, 56
 - weighted, 41
 - via interpolation, 42
 - with hierarchical splines, 47
 - with splines, 46
- Local support, 17
- LS, *vedi* Least squares

- M**
- Machine Learning (ML), 5, 28
 - definition, 28
- MARK step, *vedi* Adaptive loop
- Marking strategies, 8

- Mean Squared Error (MSE), 55
- Mesh cells, 23
- Meshes, 3
- hierarchical, 23
 - T-meshes, 4
 - tensor-product, 19
- Meshless parameterization, 90
- ML, *vedi* Machine Learning
- MLP, *vedi* Multi Layer Perceptron, *vedi* Multi Layer Perceptron
- Mother B-spline, 26
- Moving parameterization, 129
- MSE, *vedi* Mean Squared Error
- Multi Layer Perceptron (MLP), 5, 30
- Multi-degree, 19

- N**
- Nested spaces, 22
- Neural Network
 - architecture, 29
- Neural Networks (NN), 5, 27
 - definition, 29
- NN, *vedi* Neural Networks
- Nodes (NN), 29
- Non Uniform Rational B-Spline, *vedi* NURBS
- Non-negativity, 4, 17
- NURBS, 3

- O**
- Optimization, 37
 - gradient-based, 37
 - LBFGS, 151
- Output layer, 30

- P**
- Parameter Correction (PC), 130
 - footpoint projection, 131
 - iterative, 130
- Parameterization, 6
 - centripetal, 72
 - chord-length, 72
 - learning-based, 98

- meshless, 90
- moving, 129
- uniform, 72
- Parameterization with CNN (PARCNN), 72
- architecture, 75
- Parameterization with GCN (PARGCN), 88
- PARCNN, *vedi* Parameterization with CNN
- PARGCN, *vedi* Parameterization with GCN
- Partition of unity, 4, 17
- PC, *vedi* Parameter Correction
- PDM, *vedi* Point Distance Minimization
- Perceptron, 30
- Periodicity, 19
- Point clouds, 6
- boundary points, 90
 - gridded, 6, 72
 - interior points, 90
 - scattered, 6
- Point Distance Minimization (PDM), 130
- Polynomials
 - Bernstein, 18
- Properties, 17
- affine invariance, 18
- convex hull, 19
- local support, 17
- non-negativity, 17
- partition of unity, 17

Q

- QI, *vedi* Quasi-Interpolation
- Quasi-Interpolation (QI), 56
- adaptive, 62
 - hierarchical, 56
 - two-stage, 56
 - with THB-splines, 61

R

- Rectified Linear Unit (ReLU), 33
- REFINE step, *vedi* Adaptive loop

- Refinement
 - global, 4, 21
 - hierarchical, 24
 - local, 4, 21
 - strategies, 8
- ReLU, *vedi* Rectified Linear Unit
- RES, *vedi* Residual Networks
- Residual Networks (RES), 5
- skip connections, 5
- Reweighted least squares (rWLS), 49
- adaptive, 51
 - weight update, 51
- rWLS, *vedi* Reweighted least squares

S

- Scientific visualization, 3
- SDM, *vedi* Standard Distance Minimization
- SOLVE step, *vedi* Adaptive loop
- Splines, 3, 16
 - regularity, 16
- Standard Distance Minimization (SDM), 137
- Stopping criteria, 8
- Supervised learning, 28
- Surface patches, 20

T

- T-junctions, 4
- T-meshes, 4
- Tangent Distance Minimization (TDM), 130
- TDM, *vedi* Tangent Distance Minimization
- Tensor-product B-splines, 19
- Tensor-product construction, 3, 19
- Test set, 28
- THB-splines, *vedi* Truncated Hierarchical B-splines, *vedi* Truncated Hierarchical B-splines
- Training set, 28

Truncated Hierarchical B-splines
(THB-splines), 4, 22

active cells, 23

nested spaces, 22

partition of unity, 26

truncation mechanism, 26

Truncation mechanism, 26

Truncation operator, 4

Turing test, 28

U

UNI, *vedi* Uniform
parameterization

Uniform parameterization (UNI),
72

Units (NN), 29

Unsupervised learning, 29

V

Validation set, 28

W

Weighted least squares, *vedi*
Least squares, weighted
