

Table of Contents

| | |
|---|-----|
| Introduction | 7 |
| Chapter 1 | |
| The fundamental toolbox for analysing the development of a hydrogen economy | 11 |
| Introduction | 11 |
| 1.1 Hydrogen generation | 13 |
| 1.2 Hydrogen transportation and storage | 25 |
| 1.3 Hydrogen utilisation | 38 |
| Conclusions | 42 |
| Chapter 2 | |
| Hydrogen integration into the European energy system | 45 |
| Introduction | 45 |
| 2.1 Updating the EU's regulatory context to meet the needs of the low-carbon transition | 47 |
| 2.2 The EU's most recent initiatives to upscale renewable and low-carbon hydrogen | 71 |
| 2.3 A pan-European hydrogen network as a key component of the decarbonised European energy system | 80 |
| Conclusions | 88 |
| Chapter 3 | |
| Italy in the European energy transition: the role of hydrogen | 89 |
| Introduction | 89 |
| 3.1 The European Hydrogen Supply Corridors | 91 |
| 3.2 The development of a hydrogen economy in Italy | 112 |
| Conclusions | 124 |

| | |
|---|-----|
| Chapter 4 | |
| The Italian hard-to-abate sectors: a case study on potential hydrogen use | 127 |
| Introduction | 127 |
| 4.1 Fine-tuning the electricity and gas networks for hydrogen integration | 130 |
| 4.2 Demand and supply dynamics in Italy's hard to abate sectors | 139 |
| 4.3 Decarbonising the ceramics industry using hydrogen | 142 |
| Conclusions | 146 |
| Conclusion | 149 |
| Hydrogen generation | 149 |
| Hydrogen transmission | 151 |
| Hydrogen utilisation | 154 |
| Bibliography | 159 |
| Index of names | 177 |
