

Table of Contents

Preface	7
<i>Massimo Labra</i>	
Objectives and research methodology: adopting an interdisciplinary approach	11
<i>Roberto Bologna, Anna Lambertini, Luca Solari</i>	
SECTION 1	
SCIENTIFIC FRAMEWORK AND RESEARCH ISSUES	
Nature and Artifice. An holistic approach to environmental and technological design	21
<i>Roberto Bologna</i>	
Landscape-based Solutions for enhancing urban biodiversity	33
<i>Anna Lambertini</i>	
Preserving and improving biodiversity in Historic Urban Landscape	43
<i>Tessa Matteini</i>	
Urban plants biodiversity	51
<i>Francesco Ferrini, Ermes Lo Piccolo</i>	
Nature-based Solutions for water risks resilience	61
<i>Costanza Carbonari, Luca Solari</i>	
Policies and regulatory frameworks for urban and riverine nature restoration	71
<i>Giulio Hasanaj, Costanza Carbonari, Lorenzo Nofroni</i>	
SECTION 2	
TOPICS AND APPLIED METHODOLOGIES	
Nature and Culture-based Solutions for urban and territorial regeneration: governance models and tools	89
<i>Giuseppe De Luca</i>	

Thermodynamics for physical processes and energy environmental sustainability assessment at urban scale <i>Carla Balocco</i>	99
Circular economy and resources for architectural and urban regeneration projects <i>Chiara Moretti</i>	115
Biodiversity, resilience and well-being in urban projects: critical analysis on three case studies <i>Costanza Carbonari, Giulio Hasanaj, Lorenzo Nofroni</i>	125
Public engagement for nature-based regeneration of the built environment <i>Maria Vittoria Arnetoli</i>	153
SECTION 3	
APPLICATION TOOLS	
The NbS CataTool of the National Biodiversity Future Center <i>Chiara Catalano</i>	167
Nature-based Solutions for the building system <i>Giulio Hasanaj, Chiara Catalano</i>	181
Nature-based Solutions for urban forestry <i>Lorenzo Nofroni</i>	235
Nature-based Solutions for water management <i>Costanza Carbonari, Giulio Hasanaj</i>	269
Research result and open perspective <i>Roberto Bologna, Anna Lambertini, Luca Solari</i>	303
Index of Names	309
Index of Places	311
